PROFILE SUMMARY

Associate Software Engineer and MERN Stack Developer with 1 year of experience in developing responsive and scalable web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB. Skilled in building RESTful APIs, implementing dynamic user interfaces, debugging applications, and optimizing performance. Experienced in collaborating within development teams and delivering real-world full-stack solutions. Passionate about creating efficient web applications and continuously enhancing technical expertise.

PROFESSIONAL EXPERIENCE

TYSS (Bengaluru, Karnataka, India)	Associate Software Engineer	March 2025 – March 2026
Roles and Responsibilities:		
- Wrote clean and maintainable JavaScript and TypeScript code following industry best practices while developing dynamic, component-based user interfaces using React.js for modern web applications. - Developed responsive and scalable full-stack web applications using JavaScript, React.js, Node.js, Express.js, and MongoDB while following clean coding practices and modern software development standards. - Built reusable React.js components and dynamic user interfaces to improve application maintainability, responsiveness, and overall user experience across multiple devices and browsers. - Designed and integrated RESTful APIs using Node.js and Express.js to enable secure client-server communication, authentication workflows, and efficient backend functionality for web applications. - Managed MongoDB database operations including schema design, CRUD functionality, data retrieval, and backend integration while ensuring efficient storage management and optimized application performance for real-world projects. - Collaborated with development teams to troubleshoot application issues, debug frontend and backend functionality, optimize performance, and ensure smooth execution of full-stack web applications across various environments.		

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, Python - Frontend Development: React.js, Next.js (Basic), Tailwind CSS, Bootstrap, HTML5, CSS3 - Backend Development: Node.js, Express.js, Django - Databases: MongoDB, SQL - Web & API Development: RESTful APIs, JWT Authentication, CRUD Operations, API Integration, JSON, Client-Server Architecture - Version Control: Git, GitHub - Tools & Platforms: Postman, AWS (Basic), CI/CD, Vercel, Visual Studio Code, Visual Studio - Operating Systems: Windows, Linux - Soft Skills: Mentoring, Communication, Leadership, Problem Solving, Collaboration, Time Management
--

PROJECTS

Test Fresher	Online Coding Practice Platform	React.js, Vite
Live Project: https://testfreshers.qspiders.com/		
- Developed interactive and responsive frontend components for a coding practice platform using React.js and Vite, improving user engagement, application usability, and overall interface consistency across multiple devices and screen sizes. - Built reusable and scalable UI components to simplify development workflows, improve maintainability, reduce repetitive code, and ensure a consistent design system throughout the web application. - Implemented dynamic frontend features and optimized state management techniques to improve application responsiveness, reduce rendering delays, and provide users with a smoother and more interactive experience. - Collaborated closely with developers and team members to troubleshoot frontend issues, debug application errors, resolve performance bottlenecks, and maintain seamless functionality across different browsers and environments. - Ensured responsive web design and cross-browser compatibility by testing frontend functionality across devices, improving accessibility standards, and maintaining a consistent user experience throughout the application lifecycle.		
Zaroorat	Ecommerce Platform	React.js, Node.js, Express.js, MongoDB
GitHub: https://github.com/Rishabh728/Zarorat_ecommerce		
- Developed a full-stack E-Commerce web application using React.js, Node.js, Express.js, and MongoDB with focus on scalability, optimized performance, and seamless shopping experience across desktop and mobile devices. - Implemented secure user authentication and session management using Clerk Auth, enabling protected routes, user account handling, and secure access control for application functionalities and shopping workflows. - Integrated RESTful APIs and Axios for efficient product data retrieval, dynamic content rendering, cart management. - Designed advanced product browsing functionality including search, category filtering, brand-based sorting, and dynamic cart updates to improve usability, navigation efficiency, and customer interaction throughout the platform. - Built reusable and modular React.js components with React Router integration, improving code maintainability, application scalability, and navigation flow across multiple pages and user interactions.		

EDUCATION

Master of Computer Applications (MCA) | Guru Gobind Singh Indraprastha University, Dwarka, Delhi
Percentage: 86% | Duration: 2022 – 2024

Bachelor of Computer Applications (BCA) | Maharshi Dayanand University, Rohtak, Haryana
Percentage: 65.2% | Duration: 2018 – 2021
